Lab 2 – Use the Windows form elements according to you domain and demonstrate it.

Code -

Form1.cs -

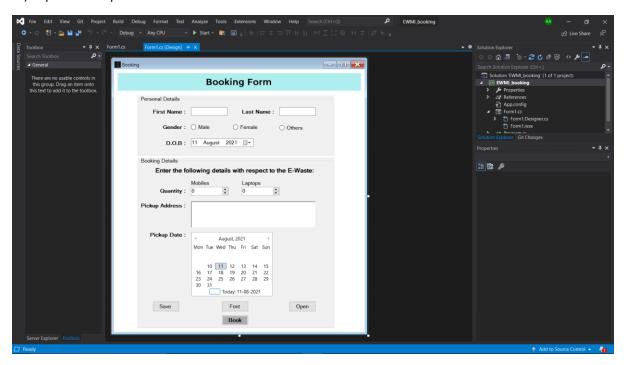

```
using System;
using System.Collections.Generic;
using System.ComponentModel;
using System.Data;
using System.Drawing;
using System.Linq;
using System.Text;
using System.Threading.Tasks;
using System.Windows.Forms;
namespace EWMI_booking
{
    public partial class Form1 : Form
        public Form1()
            InitializeComponent();
        string date = "";
        private void button4_Click(object sender, EventArgs e)
            int flag = 0;
            string name = "";
            string first = textBox1.Text;
            string second = " " + textBox2.Text;
            if (first == "")
            {
                flag = 1;
                MessageBox.Show("Please enter your name !!!");
                textBox1.Focus();
            }
            name = first + second;
            string gender = "";
            if (radioButton1.Checked == true)
                gender = radioButton1.Text;
            else if (radioButton2.Checked == true)
                gender = radioButton2.Text;
            else if (radioButton3.Checked == true)
            {
                gender = radioButton3.Text;
            }
```

```
if (gender == "")
    flag = 1;
    MessageBox.Show("Please enter your gender !!!");
}
string dob = dateTimePicker1.Value.ToLongDateString();
if (dob == DateTime.Today.ToLongDateString())
{
    flag = 1;
    MessageBox.Show("Please select your birth date!!!");
    dateTimePicker1.Focus();
}
string no_of_mob = "";
string no_of_lap = "";

            if (sfd.ShowDialog() == System.Windows.Forms.DialogResult.OK)
                string file = sfd.FileName;
                MessageBox.Show("File to be saved is :" + file);
            }
        }
    }
}
```

Screenshots of the Output -

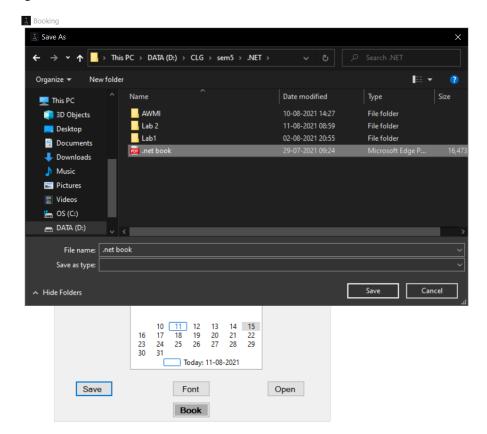

A) Expected output screen

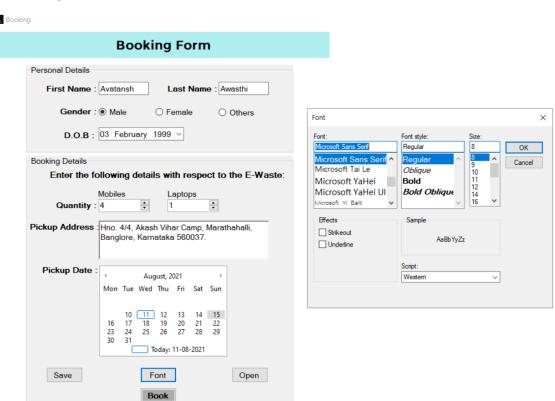

B) Filling the form

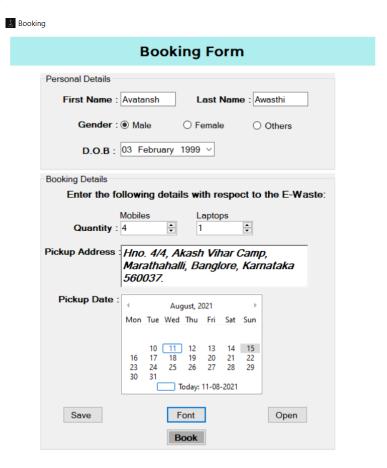

C) Save Dialogue

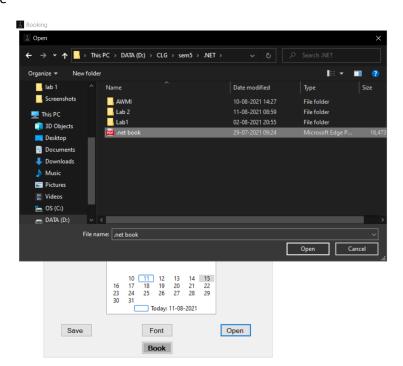

D) Font Dialogue

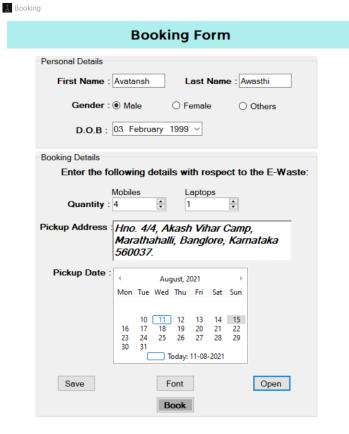

E) Change in font

F) Open Dialogue

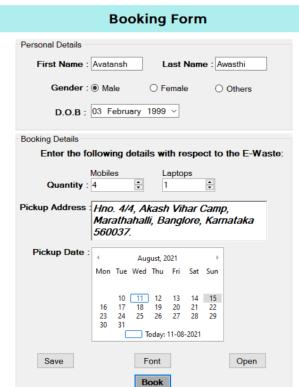

G) After selection of file

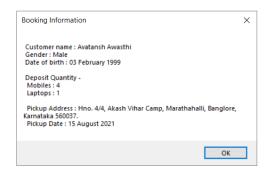

H) Booking the pickup

Booking

I)Validation

Booking Form
